Quality Timber Products

Welcome

Shaws for Sheds was set up in the year 2000 and is a family run business. We pride ourselves on quality and care on every product made and have a wide variety of buildings listed in this brochure to suit all needs, whether it's for storing or general everyday use. However, if you don't find what you are looking for, we can also look to manufacture a building to a customer's own requirements.

All our products are manufactured using quality material and all staff are fully qualified in the making of garden buildings.

All our buildings (excluding Tanalised) are pre-treated in a water based solution; however we recommend that you treat them again immediately after erection and annually thereafter. As wood is a natural product some expansion and shrinkage can occur. This is not something we can prevent.

We also use a polyester felt which is a better product than the standard shed felt; however, this does not guarantee we can prevent any damages due to adverse weather conditions.

To ensure all products are fulfilling customers needs, we are constantly reviewing our models and prices and reserve the right to change specifications without notice.

Please note: All sizes in this catalogue are approximate.

Base preparation

When buying any garden building, it is necessary to construct a base for your building to be erected onto. This does not need to be elaborate as long as it is level and firm. This can be done by:

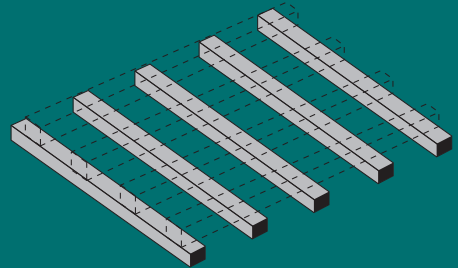

Slabbed Base

If using concrete slabs then sand would need to be laid down first onto firm ground. The slabs would then need to be bedded into the sand making sure that they are laid level.

Floor Bearers

These are tanalised treated timber of 3 x 3, which would be laid under the building in the opposite direction to the floor joist. This enables a building to be lifted off the ground so it is away from any surface water and allows air underneath your building.

On any apex and pent shed the quantity of windows would vary depending on door position and door size. Both apex and pent models can be supplied with no windows. All doors are hung right hand hinged unless specified.

New additions for 2018

Regal Summerhouse

Standard Features

- Toughened glass
- Diagonal bracing
- Mortice lock
- Ribbed barge boards
- Door drip
- Contemporary style fixed windows

Conditions of Sale

1. All orders placed with Shaws for Sheds are accepted under the following terms and conditions and such constitutes a legally binding contract which customers are advised to be aware of.
2. Upon placing your order your agent will advise you of an estimated lead time. All efforts will be made to adhere to this, but in certain circumstances beyond our control we reserve the right to extend this lead time.
3. Deliveries shall be arranged to the convenience of Shaws for Sheds in agreement with the customer, Shaws for Sheds cannot give a specific delivery time but can offer the customer a call of upto an hour before arrival from our fitting teams.
4. Customers must advise of any difficulties regarding access to the base i.e:- overhead obstructions such as overhead cables, walls, brick archways, bars over gateways etc.
5. The panels of your building need to go around your property and if necessary to accommodate, customers must remove all obstructions ie fence panels, overhanging tree branches, arches, wires, gutters etc, remember also that the panels are very heavy and our personnel are employed to erect your building and not to rectify any base or access problems.
6. If any panels are to go through a property or via a neighbours property please check on dimensions of your building to ensure that this is possible, Shaws for Sheds holds no responsibility for any damages that may occur. Under no circumstances will our fitting team go over garage, outbuilding roofs.
7. Base: It is the customers responsibility to ensure that the base is level and firm and of sufficient size to accommodate the building and to allow clearance for the roof.
8. Sizes quoted on the buildings are external wall measurements so please allow 12inches around the building to allow for roof overhangs and also remember that you may need future access to treat/maintain the building.
9. If any problems occur on delivery date due to access problems or problems with the base, our free erection service shall become void and the panels will be stored at your property and payment for the goods must be made on delivery. A £50 revisit charge is applicable if you require Shaws for Sheds to return to erect your building.
10. Shaws for Sheds use a high quality polyester based roofing felt on all our buildings, but due to varying environmental issues, or adverse weather we cannot guarantee this to be an absolute 100% waterproof product.
11. Customers must be aware that timber is a natural product which which may have/develop defects such as knots splits and resin pockets and may also swell, shrink, twist or warp with varying environmental factors, also varying climate changes may result in roof felt rippling, this is not considered to be a defective issue and no responsibility is held.
12. Shaws for Sheds will not be held responsible for any damage or lifting of roofing felt due to adverse weather conditions, also any damage caused inside or out caused by adverse weather ie:- high winds, storms, frost, extreme heat, snow, driving rain we shall not be held responsible.
13. Any bespoke building ordered must be paid in full to Shaws for Sheds prior to us manufacturing the building.
14. All our buildings are dip treated with a water based product, we highly recommend that this is followed up with a good quality wood preservative as soon as possible.
15. If you have any queries on any of the above please contact your agent who shall endeavour to assist you in your enquiry.
