Sussex range greenhouses are fully boarded around the bottom, include one side of staging and attractive Victorian style roof ridge cresting with finials.

An automatic opener for each roof window, black antique style handle and mortice lock with keys provide added security and the 4'x6' Sussex has one roof vent as standard. The door is on the 4'8" width.

The build quality sets these small greenhouses apart from the competition including the sturdy eave bracing on each side to roof bar and the 25mm thick solid damp proof barrier around the bottom which is crucial on wooden greenhouses to lift the greenhouse out of standing water.

Available in 8 superb colours or natural wood.

The smart potting store, The Oxfordshire combines a greenhouse and shed to make the most useful growing space.

Full length glass to the ground down one side prevents shadows from low boards when growing directly in to the ground. High boards with windows are fitted along the other side with a fitted side opener built in for air circulation.

The Oxfordshire includes one free staging with a fitted potting tray to help prevent any spillages while filling pots with compost and re-potting over. The Oxfordshire also includes one full length lower shelf for added storage keeping your valuable gardening tools off of the ground.
